

Project Title: Knowledge-based Resource Discovery in Distributed Environment – Mapping Unstructured Query to Structured Web Resources
Project No.: RG 017-09ICT
Principal Investigator: Assoc. Prof. Dr. Phang Keat Keong
Co-researcher (s): Assoc. Prof. Dr. Ling Teck Chaw
Project Duration: 1 April 2009 – 27 April 2010
Amount Granted: RM 79, 000.00

Abstract:

The tremendous popularity of the WWW and the availability of public accessible structured resources like XML on the web have led to active developments of structural retrieval systems. With these systems, users will be able to query for information from structured resources on the web efficiently. A retrieval method that can handle matching between a simpler form of query (e.g. natural language, keywords, or less rigid syntax), and structured resources is required.
